Puros®
Cancellous Particulate Allograft

1 PROVEN, PREDICTABLE REGENERATION
• Acts as an osteoconductive scaffold for new bone formation\textsuperscript{1,2}
• In large-volume applications, prospective studies have documented faster bone regeneration at 6 months than grafts containing sintered bovine bone matrix\textsuperscript{3,4}
• In small-volume applications, regeneration of hard bone has been reported as early as 3-5 months\textsuperscript{5,7}

2 NATURAL AND EASY TO USE
• Retains osteoconductive properties due to the preservation of the natural bone matrix collagen and mineral composition, trabecular pattern, and original porosity\textsuperscript{1,2} enabling the ingrowth of vascular and cellular connective tissue\textsuperscript{6}
• Easy handling – quick hydration, five-year shelf life and room temperature storage

3 TUTOPLAST\textsuperscript{®} PROCESS
• Sterilized and preserved using the proprietary Tutoplast Process, Puros Cancellous Particulate is a high-quality allograft designed for large and small volume bone regeneration procedures

Puros Allografts – Filling nature’s void.
A comprehensive line of allografts for bone and soft tissue augmentation needs.

The natural choice for healthy bone growth.
The bone grafting material of choice for many clinicians due to its history of well-documented clinical results.

The unique Tutoplast Process
The proprietary Tutoplast Process assures the highest standard of tissue safety and quality with minimal risk of disease transmission.9

The process preserves the valuable collagen matrix and tissue integrity while inactivating pathogens and gently removing unwanted materials, such as cells, antigens and viruses? The result is safe, biocompatible tissue.

For over 40 years, Tutoplast processed tissues have been safely used in more than three million procedures.2

Clinical advantages of Puros Cancellous Particulate Allografts

- Puros Cancellous Particulate Allografts have shown successful clinical results in:
  - Regeneration of periodontal bone and furcation defects1-2
  - Osseous defect regeneration3-4,6,7
  - Regeneration of extraction sockets5-6
  - Regeneration of gaps around block grafts5-8
  - Horizontal alveolar crest augmentation5-8
  - Sinus augmentation3-4
