# Zimmer Dental    Zimmer Dental System – Product Catalog

## How to Order

To order, call Zimmer Dental Customer Service between 6:00 a.m. and 4:30 p.m. PST, Monday through Friday, or fax your order to 1 (888) 225-2483. Overnight delivery is available, if requested. Overnight delivery orders must be placed by 4:00 p.m. PST.

To make ordering easier, please have your customer number, the catalog number and the quantity of items you wish to order. Prices do not include applicable sales tax or shipping costs. Specifications and prices are subject to change without notification.

Please note that not all products are registered or available in every country/region. Please check with a Zimmer Dental representative for availability and additional information.

Images within this catalog not to scale.

Zimmer Dental accepts VISA, Mastercard and American Express.

Payment terms are 2% 10, net 30. Discount pertains to cash payments only. All payments must be in U.S. Dollars (no foreign currency accepted).

To order call:

In the U.S. 1 (800) 854-7019

To fax an order 1 (888) 225-2483

Outside the U.S. +1 (760) 929-4300

## Return Policy

U.S. customers, please contact Zimmer Dental's Customer Service Department prior to returning product.

Please observe the following guidelines:

1. Customers may return **unopened and undamaged** Zimmer Dental product in its original package only. All returned product must be in saleable condition with the manufacturing seals intact.

2. Returned product must be accompanied by a Customer Return Number obtained from a Customer Service representative. If product is returned to Zimmer Dental without a Customer Return Number, a 15% restocking fee will be charged.
3. No credits, exchanges or refunds will be provided on discontinued product, product with a shelf life of less than six months, or instruments and tooling over 90 days. Credit or refund for returned items will be issued upon receipt and inspection of goods by Zimmer Dental.
4. All freight must be prepaid on returned merchandise.
5. Customer returning product within **30 days** of purchase may choose from the following options:
  - Full credit to customer account
  - Full exchange on product
  - Full refund
6. Customer returning product within **31-90 days** of purchase may choose from the following options:
  - Full credit to customer account
  - Full exchange on product
7. Customers returning product within **91-365 days** of purchase may choose from the following options:
  - Credit to customer account minus 15% restocking fee
  - Exchange on product minus a \$25 exchange fee for each exchanged item

8. For product returns **after 1 year** the following conditions apply:

- Only product exchanges are possible – original purchase will be credited to account, and new product will be billed at list price
- \$25 exchange fee will be charged per exchanged item

## Puros® Allograft and CopiOs® Pericardium Membrane Return Policy

Please note: Zimmer Dental does not permit the return of or offer refunds for any *Puros* Allografts or *CopiOs* Pericardium Membranes.

## Return Procedure

Contact Zimmer Dental's Customer Service Department at 1 (800) 854-7019 to obtain a Customer Return Number. This number must appear on the outside of the shipping box that contains the items being returned to Zimmer Dental.

**Do not mark any of the product packages or labeling.** Any returned package received without a Customer Return Number will be charged a 15% restocking fee. Returns will not be accepted for product that is not in saleable condition. Please send all packages, in a box, to the following address:

Zimmer Dental Inc.  
Attn: Returns Department  
6221 El Camino Real  
Carlsbad, CA 92009

International customers, please contact a local Zimmer Dental agent or dealer for return policies.

# OVERVIEW

## GENERAL INFORMATION

Zimmer Dental provides a comprehensive portfolio of innovative implant technologies designed to meet a broad range of clinical needs. For decades, Zimmer Dental has gained the trust of thousands of clinicians worldwide by helping them to **deliver successful patient outcomes**. Zimmer continues to be a market leader in the development of world-class implantology products, practice partnerships and educational programs — all focused on **empowering clinicians** and revolutionizing implant dentistry. Headquartered near San Diego in Carlsbad, California, Zimmer Dental has direct subsidiary operations in Australia, Canada, China, France, Germany, Israel, Italy and Spain, with a global network of distributors **in more than 70 countries worldwide**.

Zimmer Holdings, Inc. (NYSE and SWX: ZMH), parent company of Zimmer Dental Inc., designs, develops, manufactures and markets reconstructive orthopaedic implants, including joint and dental, spinal implants and trauma products, and related orthopaedic surgical products. Founded in 1927, Zimmer is headquartered in Warsaw, Indiana, with operations in more than 25 countries and products currently sold and represented in more than 100 countries. Nearly 8,000 employees worldwide proudly share a vision of improving the quality of patients' lives every day.

## Implant Platform Color-Coding

The chart below indicates which color corresponds to each *Trabecular Metal* and *Tapered Screw-Vent* Implant's internal hex platform. 5.7mmD platform components are compatible with the 5.7mmD platform on *AdVent* Implants.

Implant Diameter	Implant Platform	Color-coding
3.7mmD	3.5mmD	Green
4.1mmD	3.5mmD	Green
4.7mmD	4.5mmD	Purple
6.0mmD	5.7mmD	Yellow

## Abutment Emergence Profile Compatibility

Colors correspond to the abutment emergence profile on *Hex-Lock*® Contour and Short Abutments, *Zimmer* One-Piece Implants and related Contour and Short Restorative Components.

Abutment Emergence Profile*	Color-coding
3.5mmD	Light Blue
4.5mmD	Tan
5.5mmD	Rose
6.5mmD	Yellow

\*For *Hex-Lock* Contour and Short Restorative components.

### Trabecular Metal Dental Implant, MTX® Surface, 0.5mm Machined Collar with Microgrooves

Includes Fixture Mount/Transfer and Cover Screw.

#### Catalog Numbers

Implant Diameter	Implant Platform	10mmL	11.5mmL	13mmL
4.1mmD	3.5mmD	TMM4B10	TMM4B11	TMM4B13
4.7mmD	4.5mmD	TMMWB10	TMMWB11	TMMWB13
6.0mmD	5.7mmD	TMM6B10	TMM6B11	TMM6B13

**Note:** While the implant platform color code for the 4.1mmD *Tapered Screw-Vent* Implant is green, the implant surgical sequence is color-coded white on the surgical kit surface.

### Trabecular Metal Dental Implant, MTX Surface, Fully Textured with Microgrooves

Includes Fixture Mount/Transfer and Cover Screw.

#### Catalog Numbers

Implant Diameter	Implant Platform	10mmL	11.5mmL	13mmL
4.1mmD	3.5mmD	TMT4B10	TMT4B11	TMT4B13
4.7mmD	4.5mmD	TMTWB10	TMTWB11	TMTWB13
6.0mmD	5.7mmD	TMT6B10	TMT6B11	TMT6B13

**Note:** While the implant platform color code for the 4.1mmD *Tapered Screw-Vent* Implant is green, the implant surgical sequence is color-coded white on the surgical kit surface.

### Surgical Cover Screws

#### Catalog Numbers

Implant Platform	Catalog No.
3.5mmD	TSC
4.5mmD	TSCW
5.7mmD	TSC5

### Tapered Screw-Vent Implants with MTX Surface

Includes Fixture Mount/Transfer and Cover Screw.

#### Catalog Numbers

**Note:** While the implant platform color code for the 4.1mmD *Tapered Screw-Vent* Implant is green, the implant surgical sequence is color-coded white on the surgical kit surface.

## Tapered Screw-Vent Implants Features/ Benefits

### Platform Plus Technology

- Creates favorable conditions for bone-level maintenance<sup>1,3</sup>
- Lead-in Bevel – designed to reduce horizontal stresses better than flat “butt-joint” connections<sup>3,4</sup>
- Friction-Fit Connection – virtually eliminates abutment micromovement associated with screw loosening<sup>3</sup>
- 1.5mm Deep Internal Hex – shields the abutment retention screw from excess loading, distributing occlusal forces deep into the implant<sup>3</sup>

### Designed for flexibility

- A two-stage or single-stage implant system
- Various coronal configurations including machined/textured collar with and without crestal microgrooves
- Two surface options including *MTX* Microtextured Surface and *MP-1* HA Coating

1. Binon PP. The evolution and evaluation of two interference-fit implant interfaces. *Postgraduate Dent.* 1996;3:3-13.
2. Chun HJ, Shin HS, Han CH, Lee SH. Influence of implant abutment type on stress distribution in bone under various loading conditions using finite element analysis. *Int J Oral Maxillofac Implants.* 2006;21:105-202.

## TAPERED SCREW-VENT IMPLANT CELEBRATES 11 YEARS OF QUALITY

Documented prospective clinical survival rates for **1,553** *MTX*-Textured *Tapered Screw-Vent* Implants:

- Implant survival rate mean **98.7%**<sup>5</sup> (range from 95.1% to 100%)
- Follow-up times range from **3 to 120** months (mean = 36.4 months)

Primary stability achieved by using *Tapered Screw-Vent* Implants enables immediate loading in appropriately selected patients.<sup>4,6-9</sup>

### Insertion torque results\* (Ncm)

\* Average insertion torque in 50/30 bone foam block simulating a dense bone.

### Crestal Options

### Trabecular Metal Dental Implants - Fully Textured with Microgrooves (Model TMT)\*

### Trabecular Metal Dental Implants - 0.5mm Machined Collar with Microgrooves (Model TMM)\*

### Crestal Options

### Tapered Screw-Vent Implants - 1.0mm Machined Collar (Model TSV)

**Tapered Screw-Vent Implants - Full Texturing and Crestal Microgrooves (Model TSVT)**

**Tapered Screw-Vent Implants - 0.5mm Machined Collar with Crestal Microgrooves (Model TSVM)**

## Zimmer One-Piece Solutions

Engineered to perform as well as the trusted and successful *Tapered Screw-Vent* Implant, *Zimmer One-Piece Implants* bring greater simplicity and convenience to the restoration process and deliver the esthetics your patients desire. The simple one-piece design allows for a single-stage protocol, saving time and resulting in less trauma to soft tissue, and less discomfort for your patients.

### Zimmer One-Piece Implants feature:

- One-piece construction, eliminating micromovement and maximizing strength
- An integral, pre-contoured abutment, saving time
- Zimmer's proprietary *MTX* Surface, allowing for increased bone apposition and promoting osteoconductive capacity<sup>1,2</sup>
- A tapered body in a narrow 3.0mmD size

### Zimmer One-Piece Implants, Straight, with MTX Surface

#### Catalog Numbers

Implant Diameter	Abutment Emergence Profile	10mmL	11.5mmL	13mmL	16mmL
3.0mmD	3.5mmD	ZOP30S10	ZOP30S11	ZOP30S13	•

### Zimmer One-Piece Implants, 17°, with MTX Surface

#### Catalog Numbers

Implant Diameter	Abutment Emergence Profile	10mmL	11.5mmL	13mmL	16mmL
3.0mmD	3.5mmD	ZOP30A10	ZOP30A11	ZOP30A13	•

### Contour Healing Caps\*

Choose caps to match the emergence profile of the *Zimmer One-Piece Implant* being restored.

#### Catalog Numbers

Emergence Profile	Straight	17°
3.5mmD	ZOCHEAL3S	ZOCHEAL3A
4.5mmD	ZOCHEAL4S	ZOCHEAL4A
5.5mmD	ZOCHEAL5S	ZOCHEAL5A

\*Call for availability.

### Contour Restorative Kits

Includes 1 Contour Impression Cap, 1 Contour Waxing Coping, 1 Contour Abutment Analog (Plastic), and 1 Contour Provisional Coping. Choose parts to match the emergence profile of the *Zimmer One-Piece Implant* being restored.

#### Catalog Numbers

Emergence Profile	Straight	17°
3.5mmD	ZORKIT3S	ZORKIT3A
4.5mmD	ZORKIT4S	ZORKIT4A
5.5mmD	ZORKIT5S	ZORKIT5A

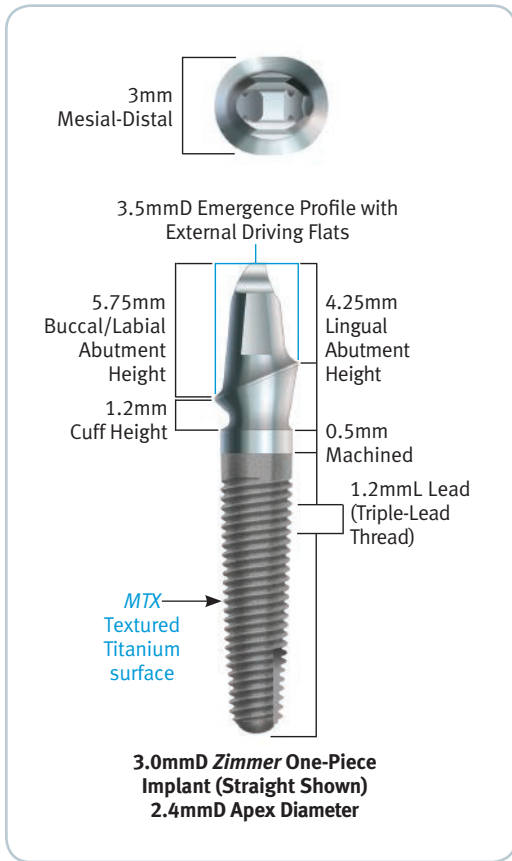

**Note:** For a complete listing of Contour Restorative Components, please refer to page 17. Contour Caps and Copings are used for both *Hex-Lock* Contour Abutments and *Zimmer One-Piece Implants*.

2. Trisi P, Marcato C, Todisco M. Bone-to-implant apposition with machined and MTX microtextured implant surfaces in human sinus grafts. *Int J Periodontics Restorative Dent* 2003;23(5):427-437.

### Zimmer One-Piece Implants

## Prosthetic Versatility.

By streamlining the implant restorative process with a more user-friendly, versatile, and innovative family of prosthetic options, Zimmer Dental has again reinforced its commitment to offering meaningful solutions to clinicians. An extensive range of easy-to-use choices are available for your restorative needs, including components for:

- Cement-Retained Restorations
- Screw-Retained Restorations
- Custom Restorations
- Overdenture Restorations
- Tissue Healing
- Impression Transfer
- Provisional Restorations

## HOW IT FITS TOGETHER IS WHAT SETS IT APART.

Zimmer's proprietary friction-fit internal hex connection is a unique combination of designs that has been shown to reduce stress on crestal bone and resist abutment screw loosening, thus creating favorable conditions for bone level maintenance.<sup>1-3</sup>

### Platform Plus Technology

Zimmer's *Tapered Screw-Vent* Implant System features the exclusive *Platform Plus* Technology that creates highly favorable conditions for long-term crestal bone maintenance:

- **Lead-in Bevel** – Designed to reduce horizontal stresses better than flat “butt-joint” connections<sup>1-3</sup>
- **Friction-Fit Connection** – Virtually eliminates abutment micromovement associated with screw loosening<sup>1</sup>
- **1.5mm Deep Internal Hex** – Shields the abutment retention screw from excess loading, distributing occlusal forces deep into the implant<sup>1</sup>

**One-degree taper** forms a friction-fit connection with the implant to **virtually eliminate micromovement**<sup>1</sup>

**1.5mm deep internal hex** shields the retention screw from excess loading<sup>1</sup>

**Lead-in bevel designed to reduce horizontal stresses** on crestal bone<sup>1-3</sup>

*Intimate contact between Zimmer's mated implant and abutment bevels.*

*Virtual cold weld that forms between Zimmer's internal hex implant and friction-fit abutment system.<sup>1</sup>*

1. Binon PP. The evolution and evaluation of two interference-fit implant interfaces. *Postgraduate Dent.* 1996;3:3-13.

2. Chun HJ, Shin HS, Han CH, Lee SH. Influence of implant abutment type on stress distribution in bone under various loading conditions using finite element analysis. *Int J Oral Maxillofac Implants.* 2006;21:105-202.

3. Mihalko WM, May TC, Kay JF, Krause WR. Finite element analysis of interface geometry effects on the crestal bone surrounding a dental implant. *Implant Dent.* 1992;1:212-217.

### Healing Collar Selection Guidelines

**Selecting a Healing Collar:**

- Determine the size of the implant platform
- Select the emergence profile that best suits the site being restored. The profile should match the transfer and abutment to be used
- Select the cuff height so that the top of the component protrudes slightly above the surrounding tissue. The options are 3mm, 5mm or 7mm

- HC3 = 3.5mmD (Implant Platform) Healing Collar
- HC4 = 4.5mmD (Implant Platform) Healing Collar
- HC5 = 5.7mmD (Implant Platform) Healing Collar

Example:

- HC343 = 3.5mmD (Implant Platform) Healing Collar  
4.5mmD Emergence Profile, 3mm Cuff Height  
(second digit equals profile, third digit equals height)

### Healing Collars

Catalog Numbers					
Implant Platform	Emergence Profile	Cuff Height			
		3mm	5mm	7mm	
● 3.5mmD	3.5mmD (No Flare)	HC333	HC335	•	
● 3.5mmD	4.5mmD	HC343	HC345	HC347	
● 3.5mmD	5.5mmD	HC353	HC355	•	
● 4.5mmD	4.5mmD (No Flare)	HC443	HC445	•	
● 4.5mmD	5.5mmD	HC453	HC455	HC457	
● 4.5mmD	6.5mmD	HC463	HC465	•	
● 5.7mmD	6.5mmD	HC563	HC565	•	

**Note:** Call for availability.

The Healing Collars are anodized with color-coding on the lower portion to indicate the implant platform diameter [Fig. A]. The top surface of the Healing Collar is etched with three numbers [Fig. B] to reference implant platform diameter (left), emergence profile diameter (top right) and cuff height (lower right). The numbers for implant platform and emergence profile show only the initial digit of the related measurement. See chart above for full measurements.

## Multi-Purpose Fixture Mount/Transfer

Tapered Screw-Vent and Screw-Vent® Implants are packaged with a multi-functional Fixture Mount/Transfer.

### Place the Implant

The Fixture Mount is used as a means to deliver the implant to the surgical site and provides convenient color-coded identification that matches the implant analogs.

 <b>Green</b>	3.5mmD Platform
 <b>Purple</b>	4.5mmD Platform
 <b>Yellow</b>	5.7mmD Platform

### Implant-Level Transfer

The Fixture Mount then functions as a transfer that is conveniently pre-attached to the implant. Surgeons can take an immediate index or impression to complete the transfer, or restoring doctors can use it after the healing period.

### Preparable Temporary Abutment

Upon complete manufacture of the implant model, the Fixture Mount may also be prepared and function as a temporary abutment for use while the final restoration is being fabricated.

## Impression-Taking Flow Chart, Implant-Level Impression

**Note:** Part numbers shown in flow chart are an example for a 3.5mmD case with a 4.5mmD emergence profile. Refer to product listings for additional part numbers. The Fixture Mount/Transfer packaged with the implant may also be used for impression-taking.

## Fixture Mount/Transfers

Includes a Retaining Screw (URS2). Can be used as a preparable temporary abutment.

### Catalog Numbers

## Strong. Beautiful. Simple.

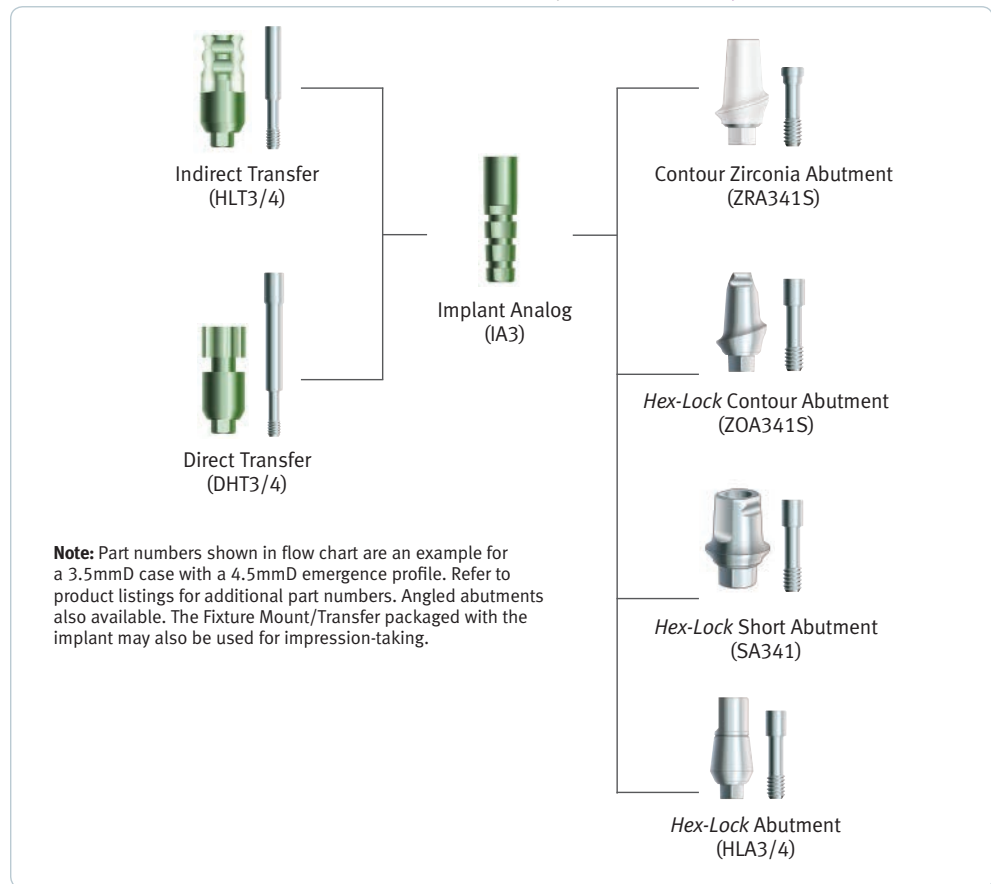

Easily attain beautiful esthetics with *Zimmer*® Contour Zirconia Abutments, which feature a pre-defined offset margin that is lower on the buccal aspect and higher on the lingual aspect to reduce or eliminate the need for preparations.

*Zimmer* Contour Zirconia Abutments feature:

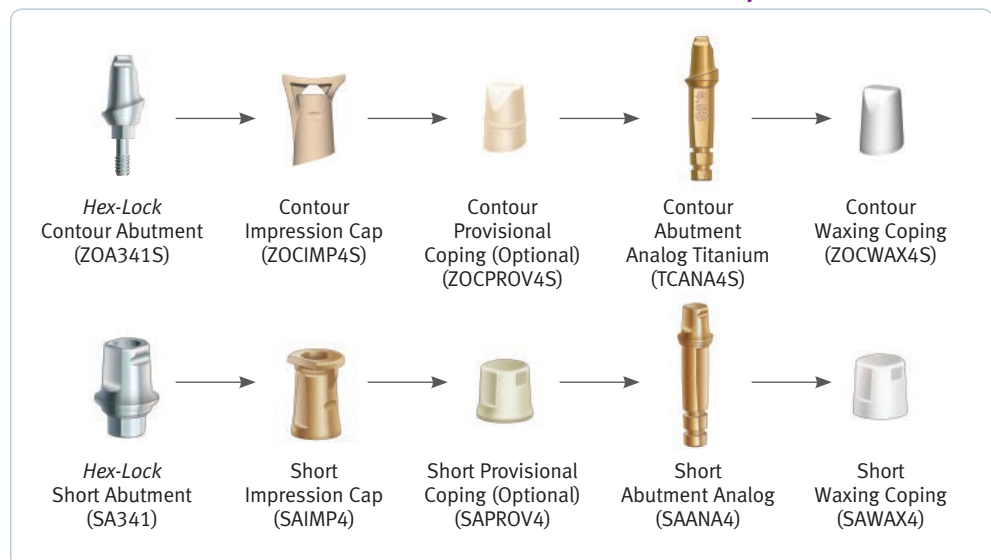

- Strong zirconia material for a natural-looking, esthetic solution
- Pre-defined margins to minimize preparation time
- A titanium interface ring that provides a titanium-to-titanium connection for a precise fit between the implant and the abutment<sup>1</sup>
- Abutment collars that are contoured below the margin, allowing space for soft tissue
- Straight and angled abutment options

### Cement-Retained Restoration Flow Chart, Implant-Level Impression

### Cement-Retained Restoration Flowchart, Abutment-Level Impression

**Note:** Part numbers shown in flow chart are an example for a 3.5mmD abutment with a 4.5mmD emergence profile. Refer to product listings for additional part numbers. Choose contour caps and copings to match the emergence profile of the *Hex-Lock* Contour Abutment or *Zimmer* One-Piece Implant being restored. Contour Abutment Analogs also available in plastic.

## Hex-Lock Contour Abutments

*Hex-Lock* Contour Abutments are designed to save time and simplify the restorative process. The abutments feature reduced facial margins that mimic the profile of soft tissue<sup>1</sup>, allowing for an esthetic result. *Hex-Lock* Contour Abutments are available in a variety of cuff heights and emergence profiles and can be used in both one and two-stage surgical protocols. The abutments feature Zimmer Dental's proprietary internal hex with friction-fit connection. When fully seated, this connection virtually eliminates micromovement<sup>2</sup>, the leading cause of screw loosening.

A full complement of contour components aide in the restoration of *Hex-Lock* Contour Abutments. These components are also used to restore *Zimmer* One-Piece Implants.

- Color-coded, snap-on Contour Impression Caps allow for simple abutment-level impressions
- Contour Provisional Copings help in creating a provisional crown to shape gingival tissue while the final restoration is being fabricated
- Contour Abutment Analogs and Contour Waxing Copings assist the laboratory in fabrication of the final restoration
- Contour Impression Caps, Abutment Analogs, Provisional and Waxing Copings are available in a restorative kit or individually
- Contour Abutment Try-ins can be used in the laboratory or in the clinician's office

## Hex-Lock Short Abutment and Restorative System

### Posterior restorations made simple, immediate and convenient

Posterior restorations present many challenges for both clinicians and labs. Limited interocclusal space in which to work, reduced visibility and of course, time-consuming prep work.

Designed to simplify the entire posterior restoration process, the Short Abutment System is both effective and easy to use. With its short cone eight, predetermined margins and off-the-shelf convenience, chair and preparation times can be significantly reduced. The restorative protocol is the same as the popular *Hex-Lock* Contour Abutment line, utilizing snap-on impression caps for easy impression-taking and prefabricated copings for provisionization and the fabrication of the final restoration.

### Short Restorative Kits

Includes 1 Short Impression Cap, 1 Short Waxing Coping, 1 Short Abutment Analog, 1 Short Provisional Coping. Choose parts to match the emergence profile of the *Hex-Lock* Short Abutment being restored.

### Hex-Lock Abutment Selection and Preparation Guidelines

**Selecting a Hex-Lock Abutment:**

- Determine the size of implant platform.
- Select the emergence profile that best suits the site being restored. The profile should match the Healing Collar and Transfer used.

- HLA3 = 3.5mmD (Implant Platform) Hex-Lock Abutment
- HLA4 = 4.5mmD (Implant Platform) Hex-Lock Abutment
- HLA5 = 5.7mmD (Implant Platform) Hex-Lock Abutment
- /3 = 3.5mmD Wide Emergence Profile
- /4 = 4.5mmD Wide Emergence Profile
- /5 = 5.5mmD Wide Emergence Profile
- /6 = 6.5mmD Wide Emergence Profile

**Preparation guidelines:**

The abutments have one score line placed 4.7mm above the top of the implant. When using the MHLAS Screw (included with the abutment), the maximum preparation on the abutment is 1mm below this line. If using the taller HLTS2 Screw (sold separately), do not prepare below the score line in order to preserve adequate hex engagement with the screw.

### Hex-Lock Abutments

Includes a Retaining Screw (MHLAS).

## Zimmer® Angled Tapered Abutments

The Angled Tapered Abutment gives you the ability to use surgical protocols that place implants off-axis. This allows you to maximize use of available bone, avoid the alveolar nerve and sinus and minimize the cantilevers for the prosthesis.

Angled Tapered Abutments are available in 15 and 30 degree options in multiple cuff heights. The Angled Tapered Abutment shares the same restorative platform as the Tapered Abutments so there's no need to learn new restorative techniques.

### Custom Restoration Flow Chart

**Note:** Part numbers shown in flow chart are an example for a 4.5mmD case with a 5.5mmD emergence profile. Refer to product listings for additional part numbers.

### “Cast-To” Gold Abutments, Engaging

## Overdenture Attachments

*Locator*® Attachments are available for the *Tapered Screw-Vent* Dental Implant System.

The *Locator* Overdenture Attachment is the ideal solution for overdenture restorations.

- **Low Profile.** A low vertical height makes the *Locator* Overdenture Attachment an effective option for treatment of a wider range of patients
- **Easy for Patients.** Self-locating attachment gives patients the ability to easily position and place their overdentures
- **Predictable.** Dual-retention and tremendous durability ensure long-lasting stability and performance<sup>1</sup>
- **Versatile.** A variety of options for retention and angulation correction lets you tailor the case to fit the needs of the patient

To select the proper abutment, measure the tissue from the top of the implant to the top of the soft tissue. Take measurements buccal, lingual, mesial and distal and use the tallest measurement. Select the abutment cuff height which matches the tallest tissue measurement. Round up to the next cuff height if necessary. The abutment will protrude 1.5mm above the tissue in order to allow engagement of the metal housing.

## Locator® Bar Attachments

The *Locator* Bar Attachment system is available for use when splinting of implants is desired to increase the stability of a bar. The system encompasses the same features as the proprietary *Locator* Implant Abutments:

- Proprietary pivoting technology provides resilient connection without loss of retention
- Self-aligning design allows the patient the ability to easily position and place their bar overdenture.
- Dual retention for long-lasting durability and performance
- Low attachment profile for limited interocclusal space

The *Locator* Bar Attachment System provides three options for the fabrication of a resilient attachment on an implant-retained cast alloy or milled titanium bar: a Drill and Tap System, a Laser Welding System, and a “Cast-To” Option.

## Zimmer Institute

Zimmer Dental is committed to providing dental professionals with the educational programs needed to **complement skill sets** and help clinicians **achieve unprecedented levels of professional satisfaction and success**. The world-class learning environment at the Zimmer Institute provides a unique opportunity for dental professionals to refine and enhance their skills. The emphasis on repetition through simulation enables participants to return home and immediately incorporate their learning experience into their own practice.

### Beyond the classroom.

Zimmer Institute transforms the traditional classroom into a **revolutionary consultative collaboration**, featuring high-definition cameras and streaming video capabilities that elevate didactic sessions to a higher level of learning. In Zimmer Institute's **Simulated Patient Training (SimLab)**, clinicians are presented with **real-life scenarios**, enabling practice of patient case exploration, case discussions and authentic supporting documentation on surgical and restorative mannequins.

For more information about course enrollment, contact a Zimmer sales representative at 1 (800) 854-7019.

## Ball Abutment Selection Guidelines

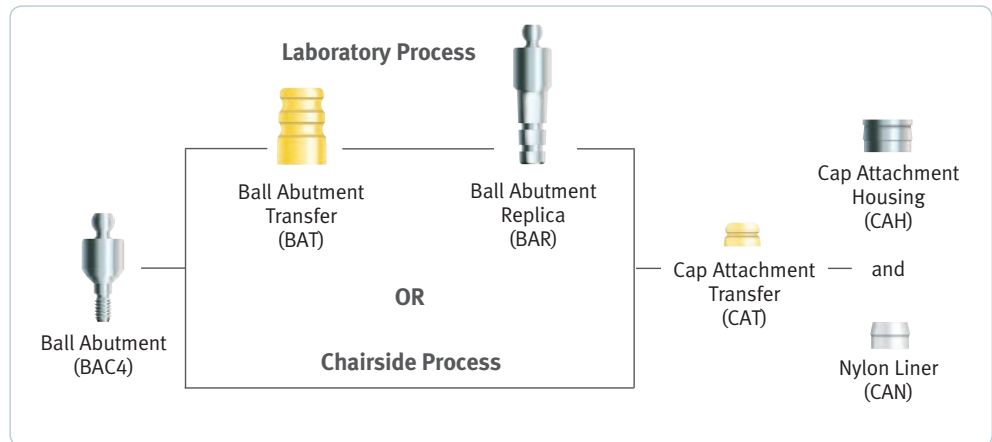

### Selecting a Ball Abutment:

- Determine the size of implant platform.
- Measure the tissue depth at its highest point from the implant platform.
- Select the cuff height of the component 1mm longer than the tissue depth so the abutment collar protrudes slightly above the surrounding tissue. The options are 2mm, 4mm and 6mm. (6mm not available for 5.7mmD platform.)

BAC = 3.5mmD Ball Abutment  
BACW = 4.5mmD Ball Abutment  
BA5C = 5.7mmD Ball Abutment  
2 = 2mm Cuff Height  
4 = 4mm Cuff Height  
6 = 6mm Cuff Height

## Overdenture Restoration Flow Chart

**Note:** Part numbers shown in flow chart are an example for a 3.5mmD case with a 4mm cuff height. Refer to product listings for additional part numbers.

## Ball Abutments

Abutments do not engage internal hex connection. Includes Cap Attachment Housing and Nylon Liner.

	Octagon/Hexagon Removal Tool for 20° Abutment Internal Connection	OHRT

## LEVERAGING PLATFORM PLUS TECHNOLOGY

The *Platform Plus* Technology difference—what no other implant can offer.

- The internal hex creates a **friction-fit connection** that shields the crestal bone from occlusal force<sup>1,2</sup>
- The lead-in bevel connection **reduces horizontal stresses** better than flat “butt-joint” connections<sup>1-3</sup>
- The 1.5mm deep internal hex **distributes bite force** deep into the implant<sup>1-3</sup>
- The internal connection is designed to **ensure ease of use** in restoration:
  - » The lead-in bevel offers assuredness in abutment orientation, providing a positive seating during placement
  - » 1mm margin provides a guide for the final restoration to ensure esthetic goals

3. Chun HJ, Shin HS, Han CH, Lee SH. Influence of implant abutment type on stress distribution in bone under various loading conditions using finite element analysis. *Int J Oral Maxillofac Implants.* 2006;21:105-202.

## AdVent Option

All *AdVent* Implants feature Zimmer Dental's proprietary *Platform Plus* Technology designed to create favorable conditions for bone-level maintenance.<sup>1,3</sup> The *AdVent* Implant is available with Zimmer's proprietary *MTX* Surface.

*MTX* Surface has been shown to allow for increased bone apposition compared to machined surfaces.<sup>4,7</sup>

- Greater than 90% BIC as compared to 42-77% BIC achieved by TPS-coated, sandblasted and acid-etched, oxidized and HA-coated surfaces placed in grafted human sinuses.<sup>4</sup>

## ADVENT IMPLANTS WITH TAPERED DESIGN

**Enhanced Initial Stability.** Following Zimmer Dental's soft bone surgical protocol, a tapered implant may be inserted into a straight, undersized osteotomy to compress soft bone for enhanced initial stability.<sup>1</sup>

### Increased Placement Options.

The tapered design allows placement between convergent roots, in areas with labial or lingual concavities, and in immediate extraction sites.

### Color-Coding for AdVent Implants

Implant Diameter	Implant Platform	Color-coding
3.7mmD	4.5mmD	
4.7mmD	4.5mmD	
4.7mmD	5.7mmD	● Yellow

The wide platform *AdVent* Implant is an ideal option for use in posterior cases and for overdenture restorations. It features a 5.7mmD prosthetic platform and utilizes *Tapered Screw-Vent* 5.7mmD platform prosthetics. Surgically, it uses the same drilling sequence as 4.7mmD *AdVent* Implants.

### AdVent Implants with MTX Surface

Includes Cover Screw and Implant Extender/Healing Cuff.

#### Catalog Numbers

Implant Diameter	Implant Platform	Connection	8mmL	10mmL	13mmL	16mmL
3.7mmD	4.5mmD	3.0mmD Internal Hexagon	AVB8	AVB10	AVB13	AVB16
4.7mmD	4.5mmD	3.0mmD Internal Hexagon	AVWB8	AVWB10	AVWB13	AVWB16
4.7mmD	● 5.7mmD	3.0mmD Internal Hexagon	AV6B8	AV6B10	AV6B13	AV6B16

**Note:** *AdVent* Implants with a 5.7mmD platform utilize *Tapered Screw-Vent* prosthetics for the 5.7mmD platform (see pages 13-29).

## AdVent Restorative Options

The *AdVent* System offers a complete assortment of prosthetics to support all of your restorative needs.

*Hex-Lock* Straight and 20° Angled Abutments are used for cement-retained restorations, offering the clinician the familiarity of traditional crown and bridge procedures.

“Cast-To” Gold Abutments are available for custom restorations for single tooth and multiple teeth restorations. The Engaging “Cast-To” Gold Abutment is used for single tooth and may be used for either screw-retained

or cement-retained restorations. Non-engaging “Cast-To” Gold Abutments are utilized for custom multiple-unit, screw-retained applications.

The Tapered Abutment offers multiple cuff height options for multiple-unit, screw-retained restorations, including overdenture bar options.

Additional overdenture options are available with the popular *Locator*® Abutments and Ball Attachments.

*AdVent* Implants are offered in two restorative platform options: 4.5mmD and 5.7mmD. The 5.7mmD platform utilizes *Tapered Screw-Vent* 5.7mmD components.

## Impression-Taking Flow Chart

## Transfer Components for AdVent Implants, 4.5mmD Platform

*AdVent* Implants with a 5.7mmD platform utilize *Tapered Screw-Vent* prosthetics for the 5.7mmD platform (see page 13 & 14), except AV6R below.

Catalog Numbers			
	Description	Emergence Profile	Catalog No.
	<i>AdVent</i> Indirect Transfer (Closed-Tray) Includes Retaining Screw (AVITS)	4.5mmD	AVIT/4
	Replacement Retaining Screw	•	AVITS
	Retaining Screw, Long, for Direct Transfer (Open-Tray) – Use with AVIT/4	•	DHTS
	<i>AdVent</i> Implant Replica, 4.5mmD Platform	•	AVR
	<i>AdVent</i> Implant Replica, 5.7mmD Platform	•	AV6R

### Fixture Mount/Transfers for AdVent Implants

Includes a Retaining Screw (URS4 for 4.5mmD platform and URS2 for 5.7mmD platform). Can be used as a preparable temporary abutment.

Catalog Numbers	
Implant Platform	Catalog No.
 4.5mmD	FMA4
 5.7mmD	FMA5
Replacement Retaining Screw, 4.5mmD Platform	URS4
Replacement Retaining Screw, 5.7mmD Platform	URS2

### Hex-Lock Abutment Selection Guidelines

**Selecting a Hex-Lock Abutment for an AdVent Implant:**

- Select the emergence profile that best suits the site being restored.

AVHL/4 = 4.5mmD Hex-Lock Abutment with a 4.5mmD Profile

AVHL/6 = 4.5mmD Hex-Lock Abutment with a 6.5mmD Profile (abutment extends 1mm past the implant interface)

**Preparation guidelines:**

The abutments have one score line placed 3mm above the top of the implant. In order to preserve adequate hex engagement with the screw, do not vertically reduce the abutment below the score line.

**Note:** AdVent Implants with a 5.7mmD platform utilize *Tapered Screw-Vent* prosthetics for the 5.7mmD platform (see page 20).

### Hex-Lock Abutments for AdVent Implants, 4.5mmD Platform

Includes a Retaining Screw (AVHLS). AdVent Implants with a 5.7mmD platform utilize *Tapered Screw-Vent* prosthetics for the 5.7mmD platform (see page 20).

Catalog Numbers		
Description	Emergence Profile	Catalog No.
 AdVent Hex-Lock Abutment	4.5mmD	AVHL/4
 AdVent Hex-Lock Abutment	6.5mmD	AVHL/6
Replacement Retaining Screw	•	AVHLS

### Angled Abutments, 20° for AdVent Implants, 4.5mmD Platform

AdVent Implants with a 5.7mmD platform utilize *Tapered Screw-Vent* prosthetics for the 5.7mmD platform (see page 20).

Catalog Numbers		
Description	Emergence Profile	Catalog No.
 AdVent Angled Abutment, 20° for 6 Positions Includes Retaining Screw (AVH20S)	4.5mmD	AVH20/4

# Shaping the Future of Implant Dentistry

Zimmer Dental is headquartered near San Diego in Carlsbad, California, and has direct operations in the U.S., Australia, Canada, China, France, Germany, Israel, Italy and Spain. In addition, our global network of exclusive distributors allows us to actively distribute our products in nearly 70 countries worldwide.

Zimmer Dental is certified to EN ISO 13485:2003, CMDCAS ISO 13485:2003, and is compliant with US CFR Part 820. We offer one of the most comprehensive dental implant product lines that meets the industry’s most stringent quality standards globally, including root-form endosseous dental implants, prosthetic attachments for restoration, surgical instrumentation, collagen-based wound healing and regenerative materials, as well as bone graft offerings.

## Custom Restoration Flow Chart

### “Cast-To” Gold Abutments for AdVent Implants, Engaging, 4.5mmD Platform

*AdVent* Implants with a 5.7mmD platform utilize *Tapered Screw-Vent* prosthetics for the 5.7mmD platform (see page 21).

Catalog Numbers		
Description	Emergence Profile	Catalog No.
<i>AdVent</i> Gold Abutment Includes Retaining Screw (AVHLS)	4.5mmD	AVGA
Replacement Retaining Screw	•	AVHLS

### “Cast-To” Gold Titanium & Plastic Castable Copings for AdVent Implants, Non-Engaging, 4.5mmD Platform

Implant-level, multiple-unit, screw-retained restorations. Each part includes a Retaining Screw (AVGCS). *AdVent* Implants with a 5.7mmD platform utilize *Tapered Screw-Vent* prosthetics for the 5.7mmD platform (see page 21).

Catalog Numbers		
Description	Height	Catalog No.
<i>AdVent</i> Bar Gold Coping	3mm	AVGC3
<i>AdVent</i> Bar Gold Coping	5mm	AVGC5
<i>AdVent</i> Titanium Bar Coping	5mm	AVTC5
<i>AdVent</i> Plastic Castable Coping	5mm	AVPC
<i>AdVent</i> Titanium Temporary Coping	•	AVTT
Replacement Retaining Screw	•	AVGCS

### Screw-Retained Restoration Flow Chart

**Note:** Part numbers shown in flow chart are an example for a 4.5mmD case with a 3mm cuff height. If no additional height is required above the implant platform, use the AVACT. When completing the restoration, Plastic Copings (ACTP) and Titanium Copings (ACTT and TTC5) are also available.

### Tapered Abutments for AdVent Implants, 4.5mmD Platform

AdVent Implants with a 5.7mmD platform utilize *Tapered Screw-Vent* prosthetics for the 5.7mmD platform (see page 22). Tapered Abutments are for multiple-unit, screw-retained restorations. Abutments do not engage internal hex connection. Includes Healing Cap (TATHC).

Catalog Numbers			
	Description	Cuff Height	Catalog No.
	Tapered Abutment	No Added Height	AVACT
	Tapered Abutment	3mm	AVACT3
	AdVent Extender	2mm	AVE

### Tapered Abutment Healing Cap

Healing Cap threads onto the Tapered Abutment.

Catalog Numbers		
	Description	Catalog No.
	Tapered Abutment Titanium Healing Cap	TATHC

# Locator® Overdenture Attachments

Locator Attachments are available for the AdVent Dental Implant System.

The *Locator* Overdenture Attachment is the ideal solution for overdenture restorations.

- **Low Profile.** A low vertical height makes the *Locator* Overdenture Attachment an effective option for treatment of a wider range of patients
- **Easy for Patients.** Self-locating attachment gives patients the ability to easily position and place their overdentures
- **Predictable.** Dual-retention and tremendous durability ensure long-lasting stability and performance<sup>1</sup>
- **Versatile.** A variety of options for retention and angulation correction lets you tailor the case to fit the needs of the patient

To select the proper abutment, measure the tissue from the top of the implant to the top of the soft tissue. Take measurements buccal, lingual, mesial and distal and use the tallest measurement. Select the abutment cuff height which matches the tallest tissue measurement. Round up to the next cuff height if necessary. The abutment will protrude 1.5mm above the tissue in order to allow engagement of the metal housing.

1. Data on file with Zest Anchors, LLC.

## Tapered Abutment Transfer Components, 4.5mmD Platform

Transfers thread onto the Tapered Abutment for impression-taking. This method transfers the Tapered Abutment position.

Catalog Numbers		
	Description	Catalog No.
	Tapered Abutment Direct Transfer (Open-Tray) Includes Transfer Screw (SCDTS)	ACTDT
	Tapered Abutment Indirect Transfer (Closed-Tray)	ACTIT
	Tapered Abutment Replica	ACTR

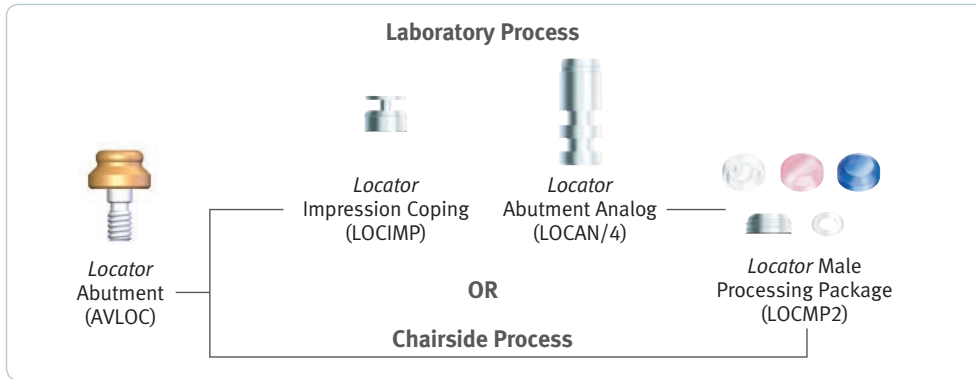

## Tapered Abutment Copings, Sheaths and Bar Systems, 4.5mmD Platform

The copings listed below fit over the Tapered Abutment and are secured with a Coping Screw.

Catalog Numbers			
	Description	Height/ Length	Catalog No.
	Tapered Abutment Gold Coping Includes Screw (SCTS)	•	ACTGC
	Titanium Temporary Coping Includes Screw (SCTS)	9.5mm	ACTT
	Plastic Castable Coping Includes Screw (SCTS)	5mm	ACTP
	Bar Gold Coping – Includes Screw (SCTS)	3mm	TGC3
	Bar Gold Coping, Long – Includes Screw (SCTS)	5mm	TGC5
	Titanium Bar Coping Includes Screw (SCTS)	5mm	TTC5
	Replacement Screw for Copings	•	SCTS
	Tapered Abutment Waxing Screw	12mm	SCWS
	Reamer for Tapered Abutment Copings	•	PR

### Locator® Overdenture Restoration Flowchart

### Locator Abutments for AdVent Implants, 4.5mmD Platform

AdVent Implants with a 5.7mmD platform utilize *Tapered Screw-Vent* prosthetics for the 5.7mmD platform (see page 24).

## Locator® Bar Attachments

The *Locator* Bar Attachment system is available for use when splinting of implants is desired to increase the stability of a bar. The system encompasses the same features as the proprietary *Locator* Implant Abutments:

- Proprietary pivoting technology provides resilient connection without loss of retention
- Self-aligning design allows the patient the ability to easily position and place their bar overdenture.
- Dual retention for long-lasting durability and performance
- Low attachment profile for limited interocclusal space

The *Locator* Bar Attachment System provides three options for the fabrication of a resilient attachment on an implant-retained cast alloy or milled titanium bar: a Drill and Tap System, a Laser Welding System, and a “Cast-To” Option.

### Locator Abutment Transfer Components

## The Zimmer Surgical Motor System

### Intelligent design and distinctive detail.

The result of years of research, development, and refinement by industry leader W&H, the *Zimmer* Surgical Motor System is the finest in intelligent design and simplicity. Designed for surgical specialists who perform implantology and maxillofacial surgery, this surgical motor system will quickly become your preferred solution for implant placement and bone grafting.

#### System Components

**Console** – For maximum clarity and convenience, the console features a simple array of buttons and a bright, easy-to-read display. Program settings are simple to change for use with other implant systems.

**Motor** – Utilizing a universal ISO connection, the motor can be used with straight and contra-angle handpieces of all types. This quiet-running, maintenance-free motor can be easily sterilized.

**Irrigation Tubing** – Conveniently included with the system, the one-piece irrigation tubing requires no assembly and is disposable, saving you time on routine maintenance. A variety of tubing is also available to meet your practice needs.

**Foot Pedal** – Foot pedal allows you to easily turn motor on and off, switch programs, adjust clockwise/counter-clockwise, seamlessly control the motor speed, as well as turn the coolant pump on and off.

**ATTENTION: Part #02139800, Testing gauge for burs provided with the motor is a required part for proper use of all W&H handpieces. This gauge tests the bur's shaft to ensure it has not been affected. If burs are not tested prior to use, they can jam inside the handpiece and severely damage the mechanisms. Call Zimmer Dental for additional information.**

## Zimmer Surgical Motor System

### System Features

- Designed for implantology and other maxillofacial applications
- Simple, user-friendly programs and maintenance-free features for convenience and time savings
- Increased torque control for confidence during surgeries
- Quiet performance of motor and handpieces
- Wide speed range of 300 to 40,000 rpm (1:1)
- Worldwide service locations\*

(see page 52 for more information)

### Zimmer Guided Surgery

(see page 49 for more information)

\* Drop-in modules sold separately.

### Zimmer Instrument Kit System

is compatible with the following Zimmer Dental Implants:

- *Trabecular Metal* Dental Implants
- *Tapered Screw-Vent* Implants
- *Zimmer* One-Piece Implants (see module above)
- *AdVent* Implants

**Note:** The *AdVent* Countersink Drill (AVCSD or AV6SCD) is not included in the *Zimmer* Instrument Kit System and must be purchased separately.

## A SINGLE KIT FOR MULTIPLE SURGICAL PROCEDURES

- One kit to support four different implant platforms
- Easy-to-use drop-in modules for more advanced surgical techniques
- No switch cost between procedures\*

### SOFT AND DENSE BONE PROTOCOLS

- Soft bone surgical protocol allows for bone compression to provide additional stability in poor quality sites<sup>1</sup>
- Dense bone surgical protocol enables apical bone engagement for initial stability<sup>1</sup>

**Zimmer Drill Stop Kit**  
(see page 54 for more information)

## A SMARTER SOLUTION FOR CONTROLLING DRILLING DEPTH

The *Zimmer Drill Stop Kit* includes a set of reusable titanium drill stops designed to limit drilling depth from bone level during osteotomy preparation.

\* For *Zimmer Trabecular Metal Dental Implants*, *Tapered Screw-Vent Implants*, *Zimmer One-Piece Implants* and *AdVent Implants*.

## Surgery Just Got Easier

With the *Zimmer* Instrument Kit System there's no more straining your eyes looking for the right tool or worrying about optimizing your time.

- Everything is logically organized with an intuitive instrument flow that complements the surgical sequence for each implant diameter
- Kits and selected instruments are color-coded by implant diameter and according to the surgical protocol
- Instruments are clearly labeled for easy identification
- Kit layout and drilling sequence charts are provided to give you additional step-by-step guidance

Kits are designed for flexibility. Use just one kit to place *Trabecular Metal*, *Tapered Screw-Vent*, *Zimmer One-Piece* and *Advent* Implants. The kit can also be upgraded easily for use with *Zimmer Guided Surgery* Instrumentation.

## A SMARTER SOLUTION FOR CONTROLLING DRILLING DEPTH

The *Zimmer* Drill Stop Kit includes a set of reusable titanium drill stops designed to limit drilling depth from bone level during osteotomy preparation.

### ◎ SIMPLY "PICK & GO"

- Ease of use
- Time savings
- Cost-efficient design

Drill Stops are only intended for use with updated *Dríva* Drills marked with axial stripes.

With convenient “pick & go” simplicity, easy-to-follow color-coding and organization, and a host of other time-saving features, the Zimmer Drill Stop Kit is designed to rise above all other depth control solutions.

#### Step 1:

Select the appropriate Drill Stop.

#### Step 2:

Verify drilling depth by using the Drill Depth Guide.

#### Step 3:

Create the osteotomy to a predetermined depth.

#### Step 4:

When done, simply disengage the Drill Stop using the Multi-tool or by hand.

#### Step 5:

Before placing the Drill Stop back into the kit, verify the stop's location in the kit by using the Drill Stop Guide to ensure proper placement.

## Sample Sequence

Osteotomy for a 3.7mmD x 13mmL Tapered Screw-Vent Implant, using a 17/22mmL Driva Drill.

1

SV2.3DN  
2.3mmD  
Drill

**Step 1:** From the 13mmL implant row, select the Drill Stop for a 2.3mmD Pilot Drill.

#### For Soft Bone

2

SV2.8DN  
2.8mmD  
Drill

#### For Dense Bone

2

TSV3DN  
3.4/2.8mmD  
Drill

**Step 2:** From the same row, select the Drill Stop for a 2.8mmD Drill (final for soft bone) or skip to the Drill Stop for a 3.4/2.8mmD Step Drill (final for dense bone).

## High-Performance Driva Drills

A product of extensive research and testing, high performance and internally-irrigated *Driva* Drills are reusable and deliver high levels of sharpness and longevity.

- Enhanced drill design to facilitate cleaning and sterilization
- Color bands and size etching help in simple identification and replacement
- All drills are made of an advanced grade of stainless steel, with a progressive geometry that provides high levels of strength and cutting efficiency
- A corrosion-resistant coating protects drill sharpness
- Grooves and laser-etched depth bands deliver improved visibility

### Countersink Drills for AdVent Implants

#### Catalog Numbers

Diameter	Catalog No.
 4.8/2.8mmD Countersink Drill	AVCSD
 6.0/3.8mmD Countersink Drill	AV6CSD

The depth markings are machined and laser-etched for increased visibility. The bands are located approximately 1mm longer than the implant-abutment junction.  
(for example: the 13mm band is dimensioned 14mm from the tip of the drill)

### Cleaning Tool

Catalog Numbers		
Description	Catalog No.	Qty.
 Driva Drill Cleaning Wire	NM1940	1 Ea.

### Surgical Instruments for Tapered Screw-Vent, Screw-Vent and AdVent Implants

Catalog Numbers		
Description	Catalog No.	
 GemLock Retaining Square Ratchet for Implant Placement with Hex Drivers RH2.5/RHL2.5 or FMT Directly	RSR	
 Stainless Steel Screwdriver Handle with Square Connection for Implant Placement with Hex Drivers RH2.5/RHL2.5 or FMT Directly	SSHS	

### Hex Drivers 1.25mmD for Tapered Screw-Vent, Screw-Vent and AdVent Implants

Catalog Numbers		
Description	Catalog No.	
 Hex Driver, Short, for Tightening of Surgical and Prosthetic Screws (1.25mmD, 17mmL)	HX1.25	
 Hex Driver, Long, for Tightening of Surgical and Prosthetic Screws (1.25mmD, 22mmL)	HXL1.25	
 Hex Driver, Short, with GemLock Retention (1.25mmD, 22mmL)	HXGR1.25	
 Hex Driver, Long, with GemLock Retention (1.25mmD, 30mmL)	HXLGR1.25	
 Latch-Lock Hex Driver (Short) for Surgical and Prosthetic Screws (1.25mmD, 23mmL) (may require Reduction Handpiece)	HX1.25D	
 Latch-Lock Hex Driver (Long) for Surgical and Prosthetic Screws (1.25mmD, 26mmL) (may require Reduction Handpiece)	HXL1.25D	

### Hex Drivers 2.5mmD for Tapered Screw-Vent, Screw-Vent and AdVent Implants

Catalog Numbers		
Description	Catalog No.	
 GemLock Retaining Hex Driver (2.5mmD, 21mmL)	RHD2.5	
 GemLock Retaining Hex Driver, Short (2.5mmD, 17mmL)	RH2.5	
 GemLock Retaining Hex Driver, Long (2.5mmD, 28mmL)	RHL2.5	

**Note:** 2.5mmD Hex Drivers (GemLock Delivery System) should be used to deliver all Tapered Screw-Vent Implants via the Fixture Mount/Transfer.

## Multiple configurations. Streamlined procedures.

Individual needs and surgical styles are met with one easily customizable kit.

- The *Tapered Screw-Vent* Surgical Kit can be easily combined with an optional module to allow customization for *Zimmer Guided Surgery*
- Standalone options are available for the individual *Tapered Screw-Vent* or *Zimmer One-Piece* kits
- Our unique Staging Block allows you to have just the instruments you need next to the patient during surgery
- Extra storage space is available for additional instruments

Complete *Tapered Screw-Vent* Surgical Kit

*Zimmer Drill Module* for Guided Surgery

### Hex Drivers 3.0mmD for Tapered Screw-Vent and AdVent Implants

#### Catalog Numbers

	Description	Catalog No.
	Hex Driver for Implants with 3.0mmD Hex (may require Reduction Handpiece) (3.0mmD, 25mmL)	HX3.0D
	Hex Driver, Short, for Implants with 3.0mmD Hex (3.0mmD, 17mmL)	HX3.0-S
	Hex Driver, Long, for Implants with 3.0mmD Hex (3.0mmD, 28mmL)	HXL3.0-S

**Note:** 3.0mmD Hex Drivers are used to place the 6.0mmD *Tapered Screw-Vent* and all *AdVent* Implants without a Fixture Mount/Transfer.

### Cortical Bone Taps (Triple-Lead Threads) for Tapered Screw-Vent and AdVent Implants

#### Catalog Numbers

	Description	Catalog No.

## Supporting and Inspiring Nature.

Zimmer Dental's comprehensive biologically derived regenerative portfolio has expanded to include non-biologic products: *IngeniOs* Synthetic Bone Particles.

These 100% non-biologic products are made of pure-phase hydroxyapatite (HA) and can be utilized alone or as a graft mix-in providing radiopacity or volume preservation. They are designed to support vascularized bone formation, osseointegration and have up to 80% interconnected porosity.

These pure-phase beta tricalcium phosphate 100% non-biologic products are silicated, providing the potential for increased bioactivity. They are designed to resorb in balance with replacement by naturally-regenerating mineralized bone and have 75% interconnected porosity, which is designed to enable ingrowth of healthy bone tissue.

## The Collagen Advantage

Zimmer Collagen Wound Dressings, BioMend Membranes, and Zimmer Socket Repair Membranes are composed of Type I Collagen derived from xenogenic tendon. Due to the physiochemical properties of the collagen matrix, these products promote wound healing, are nonimmunogenic, and are resorbed by the body.

## Sinus Lift Solutions

### ZIMMER SINUS LIFT BALLOON

**KEY BENEFIT:** *Zimmer Sinus Lift Balloon* is a versatile, minimally invasive tool designed to gently and uniformly lift the Schneiderian membrane without the use of sharp instruments.

### SINUS LATERAL APPROACH KIT

**KEY BENEFIT:** Provides the instrumentation needed to ensure a minimal flap size and window size over conventional techniques. Additionally, instruments provide a method of opening the lateral wall near the crest.

### SINUS CRESTAL APPROACH KIT

**KEY BENEFIT:** Minimally invasive instrumentation designed to create an osteotomy into the inferior cortical bone without tearing the Schneiderian membrane.

Sinus Crestal Approach

### RC SINUS LIFT KIT

**KEY BENEFIT:** The RC Sinus Lift Kit is a set of five instruments for use in releasing and elevating the Schneiderian membrane. Custom-designed instruments for both left- and right-sinus angulations. All instruments are designed with grooves for grip control, plus color and number coding to assist the clinician. Instrument #2 (Piezio-like tip) is also sold separately.

## Zimmer Institute

Zimmer Dental is committed to providing dental professionals with the educational programs needed to **complement skill sets** and help clinicians **achieve unprecedented levels of professional satisfaction and success**. The world-class learning environment at the Zimmer Institute provides a unique opportunity for dental professionals to refine and enhance their skills. The emphasis on repetition through simulation enables participants to return home and immediately incorporate their learning experience into their own practice.

### Beyond the classroom.

Zimmer Institute transforms the traditional classroom into a **revolutionary consultative collaboration**, featuring high-definition cameras and streaming video capabilities that elevate didactic sessions to a higher level of learning. In Zimmer Institute's **Simulated Patient Training (SimLab)**, clinicians are presented with **real-life scenarios**, enabling practice of patient case exploration, case discussions and authentic supporting documentation on surgical and restorative mannequins.

For more information about course enrollment, contact a Zimmer sales representative at 1 (800) 854-7019.

## SURGICAL

### IMPLANTS

<i>Zimmer Trabecular Metal</i> Dental Implants	3
<i>Tapered Screw-Vent</i> Implants	3, 4
<i>Zimmer One-Piece</i> Implants	9
<i>AdVent</i> Implants	31

### MICROMOTORS AND ACCESSORIES 42

### SURGICAL INSTRUMENTS

<i>Zimmer</i> Surgical Motor System	41
<i>Zimmer</i> Instrument Kit System	43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53
<i>Zimmer</i> Drill Module	46, 49, 59
<i>Zimmer</i> Drill Stop Kit and Compatible Drills	44, 54, 55, 56
Surgical Drills	50, 57
Surgical Handpieces	41
Surgical Instruments for <i>Tapered Screw-Vent</i> , <i>Screw-Vent</i> and <i>AdVent</i> Implants	58
Surgical Kit for <i>Trabecular Metal</i> , <i>Tapered Screw-Vent</i> , <i>Zimmer One-Piece</i> and <i>AdVent</i> Implants (complete)	48, 52
Surgical Kits and Instruments for <i>Tapered Screw-Vent</i> Implants	47
Surgical Kits and Instruments for <i>Zimmer One-Piece</i> Implants	52
Surgical Saw Blades	41
Surgical Step Drills	50, 57
Surgical Tray and Drills for <i>Trabecular Metal</i> and <i>Tapered Screw-Vent</i> Staging Block	48
<i>Tapered Screw-Vent</i> Staging Block (Block only)	48
<i>Tapered Screw-Vent</i> Starter Kit	48
Hex Drivers for <i>Tapered Screw-Vent</i> , <i>Screw-Vent</i> and <i>AdVent</i> Implants, 1.25mmD	58
Hex Drivers for <i>Tapered Screw-Vent</i> , <i>Screw-Vent</i> and <i>AdVent</i> Implants, 2.5mmD	58
Hex Drivers for <i>Tapered Screw-Vent</i> and <i>AdVent</i> Implants, 3.0mmD	59
Cortical Bone Taps (Triple-Lead Threads) for <i>Tapered Screw-Vent</i> and <i>AdVent</i> Implants	59
Cortical Bone Taps for <i>Zimmer One-Piece</i> Implants	53
Countersink Drills for <i>AdVent</i> Implants	57
Implant Try-Ins for <i>Zimmer One-Piece</i> Implants	53
Surgical Cover Screws	3
Surgical Cover Screws and Implant Extender/Healing Cuff, 4.5mmD Platform	32
<i>Zimmer One-Piece</i> Kit System	51, 52
<i>Zimmer One-Piece</i> Module (Plate only)	52

**SIMPLANT TREATMENT PLANNING SOFTWARE**

<i>SimPlant</i> Master	50
<i>SimPlant</i> Optional Modules	50
<i>SimPlant</i> Planner	50
<i>SimPlant</i> Pro	50

<b>TRADEMARK AND MANUFACTURER INFORMATION</b>	<b>76</b>
-----------------------------------------------	-----------

## Trademark and Manufacturer Information

Locator is a registered trademark of Zest Anchors, Inc. Locator Attachments are manufactured by Zest Anchors, LLC and distributed by Zimmer Dental Inc. Zimmer Surgical Motor System and ImplantMED Surgical Motors are manufactured by W&H Dentalwerk Bürmoos GmbH and offered by Zimmer Dental Inc. ImplantMED is a registered trademark of W&H Dentalwerk Bürmoos GmbH. SimPlant is a registered trademark of Materialise Dental NV. SimPlant Treatment Planning Software is distributed by Zimmer Dental Inc. Tutoplast is a registered trademark of RTI Biologics, Inc. Puros Allografts and CopiOs Pericardium Membrane are manufactured by RTI Biologics, Inc. and marketed by Zimmer Dental Inc. In certain countries, BioMend and BioMend Extend Membranes are manufactured by Collagen Matrix, Inc. and distributed by Zimmer Dental Inc. Prior to June 2013, and thereafter in certain countries, BioMend and BioMend Extend Membranes were/are manufactured by Integra LifeSciences Corporation. CopiOs Extend Membrane, Zimmer Collagen Plug, Tape and Patch and Zimmer Socket Repair Membrane are manufactured by Collagen Matrix, Inc. and distributed by Zimmer Dental Inc. Zimmer CurV Membrane, Zimmer Collagen Capsule and Wedge products and RC Sinus Lift Kits are manufactured by Osseous Technologies of America for Zimmer Dental Inc. IngeniOs  $\beta$ -TCP Bioactive and IngeniOs HA Synthetic Bone Particles are manufactured by curasan AG and distributed exclusively by Zimmer Dental Inc. Sinus Lateral Approach Kit and Sinus Crestal Approach Kit are manufactured by Neobiotech Co., Ltd. and distributed by Zimmer Dental Inc. Zimmer Sinus Lift Balloon is manufactured for Zimmer Dental Inc. by ARMM, Inc. XCPT is a registered trademark of XCPT Communication Technologies, LLC. Zimmer Patient Consultation Tool is developed by XCPT Communication Technologies, LLC and distributed by Zimmer Dental Inc.
